01 PROFILE

I implement AI systems in real operations: I map the process with the business, design the solution and ship it to production, with agents doing part of the work and people keeping the decision. Full stack developer since 2024, after six years in commercial management in the tech sector.

02 EXPERIENCE

Sep 2025 – today

Full Stack Developer · Independent · freelance, no direct employment contract

Bendita IA · Claude Impact Lab Chile — Apr – Aug 2026
Lead Frontend · *Anthropic's programme in Chile*

- Platform that ran both verticals of the programme, Fintech and Longevity: 1,656 applications, 100 teams and 3,277 evaluations.
- Evaluator portal on top of Claude agents (Haiku and Sonnet 4.5) that pre-score each submission with evidence; the human evaluator makes the call.
- The second vertical, with a different partner and rubric, was stood up through configuration on the same codebase; ~970 test cases and agent guardrails.

Cargo Electric Blue SpA — Client since Sep 2025
Full Stack Developer & Product Owner · *Last-mile logistics with an electric fleet*

- Defined the product with the operations team and moved 10,000+ route records from spreadsheets into a single platform for operations, analytics, finance and people management; end-of-day data entry dropped 75%, from 2–4 hours to one or less.
- Automated rate-card invoicing and driver bonus calculations, reconciled monthly against the real payroll sheet.
- Role-based access for admin, board and clients; 619 of the web app's 632 commits.

Portokali Café — Mar – Sep 2026
Lead developer, with Poweredia

- From WordPress to Next.js 15 with an MVP in seven days; a later audit caught a form silently losing job applications for five months.

Nov 2024 – Aug 2025

AI Research Contributor · Outlier

- Evaluated GPT-4, Claude and Gemini models and defined quality criteria for enterprise use cases.

May – Dec 2024

Full Stack Developer & QA · Vemex Digital

- Web applications with React and Next.js, testing and performance optimisation.

2017 – 2023

Commercial & channel management · Hikvision · Dahua · SSTT · Orama · Wetland

- National distribution networks, public tenders and multi-stakeholder projects.

03 STACK AND SKILLS

WITH CLIENTS	Process discovery · product ownership · stakeholders · Scrum	AI AND AGENTS	Claude API · tool use · human-AI evaluation · guardrails · LangGraph · RAG
STACK	Next.js · TypeScript · Supabase · Firebase · Python · Vercel	LANGUAGES	Spanish (native) · English, fluent (C1)

04 EDUCATION

2025 – 2026 — **Diploma in Generative AI in Organizations** · Universidad de Chile, FEN

2022 – 2024 — **Certified Web Developer** · Digital House Coding School

2009 – 2014 — **Environmental Engineer** · Universidad de Falcón, Venezuela
